

Footed sugar dish

Ceramics and Glass Collection

Accession Nr.: 16514 

Date of production: ca. 1820

Place of production: Bohemia

Materials: colourless lead glass

Techniques: gilded; grinded

Dimensions: height: 11,5 cm
 diameter: 14,3 cm

The round foot of a zigzag faceted rim holds the short stem, faceted into eight sides. The hemi-spherical bowl narrows excessively at the neck and ends in a splayed broad top rim. The bottom of the foot is faceted in a star motif the surface is partly faceted, partly decorated with fluted cameo faceting. The horizontal stripe of a faceted net pattern is topped by two lines. The whole surface of the broad top rim is gilt on the inside.
