

Ornamental vessel

Ceramics and Glass Collection

Accession Nr.: 69.1202.1 

Date of production: ca. 1820

Place of production: Austria

Materials: colourless lead glass

Techniques: blown; grinded

Dimensions: height: 15,7 cm
 opening diameter: 11,5 cm
 base diameter: 9 cm

The whole surface of the splayed, bucket-shaped body is decorated with diamond faceting and faceted flutes. The rim is lined with fan lobes. There is a band of stylised acanthus leaves, on the foot and below the top rim. A relief is on the two sides of the body, imitating leaved branches with berries, the handles on the two sides are form winged serpent figures, connected to the branches.
