

Perfume bottle with stopper

Ceramics and Glass Collection

Accession Nr.:	17346.a-b 
Artist/Maker:	Egermann, Friedrich (1777 - 1864)
Place of production:	Bohemia
Inscription:	jelzetlen
Techniques:	blown; faceted; gilt; grinded
Dimensions:	height: 10,5 cm opening diameter: 3,5 cm

The swelling body is faceted into eight sides and stands on an exceedingly short, round foot. Its protruding shoulder line is faceted into eight sides, continued into a splayed neck. Each side of the body shows a faceted, almond-shaped ornament, framed by gold. It is surmounted by gilt, geometrical, stylised flower motifs. The neck is lined by a meander pattern and stars, much faded. The inside of the top rim is gilt in a broad stripe. The stopper is of turquoise, transparent glass, faceted into six sides and ending in a point.
