

Lobster fork (lobster pick)

Metalwork Collection

Accession Nr.: 53.5030.1 

Date of production: ca. 1900

Inscription: ARGENTOR

Techniques: cast

Dimensions: length: 19 cm

It is made to spear lobster served in a shell. Because the lobster shell is steadied in one hand and the lobster fork is held in the other, the utensil is used only at informal meals.
