Stand

Furniture Collection

Accession Nr.:	54.622.1
Date of production:	late 19th century
Materials:	ebony inlay; maplewood veneer; thuya root; walnut root
Techniques:	polished; turned
Dimensions:	height: 88 cm diameter: 39 cm

The central, triangular stem rests on three curved and joint plates that join the stem on the edges. The middle of the stem is decorated with a trellis inset. The hexagonal top is supported by three consoles. The arched frieze is decorated with turned balusters. The rich mosaic-like inlay-work of the stands is geometrical. The table was made for western export and is a typical example of oriental decoration.
